Request for Proposals

TITLE: PLPT Network Node Operations and Maintenance

The Pyramid Lake Paiute Tribe (PLPT) is soliciting quotes from qualified companies to perform maintenance and emergency tasks related to the operation of our network nodes. PLPT has just completed a major fiber network installation. The selected company will be responsible for a variety of tasks requiring expertise in a number of areas.

Systems Description

The PLPT has completed a fiber network that currently connects 29 buildings in three towns on the Pyramid Lake Reservation 35 miles east of Reno. The system is built around three node buildings in the towns of Nixon, Wadsworth and Sutcliffe. The POP is at the Level 3 facility in Reno, NV and the datacenter node is in Nixon. The fiber electronics is Tellabs equipment, and we have a support contract for the equipment. Essential system elements include Tellabs 7100 and 7300 fiber electronics; Generac 50 and 70 KWh propane generators with Generac transfer panels; Eltek 48 volt Flatpack power systems with Telect distribution rack distribution; Marvail Compac AC units with CommStat 3 controllers; DPS Telecom NetGuardian and T/Mon alarm systems with entry security; Solarwinds and Cellular notification systems; Lorex Video Security system; Fenwall FM 200 fire suppression system with 732 controllers.

Tasks

The company will be required to augment the PLPT IT staff with various tasks and the handling of emergencies. This will include the company or associated subcontractors performing scheduled onsite service and maintenance checks and emergency repairs.

Scope of Proposal

Routine scheduled maintenance calls will require fixed costs for expected time, materials and travel. Repair costs will require an hourly rate for emergency support service. Include travel costs when travel is necessary for emergency repairs. Due to the wide range of expertise required, more than one company may be awarded a maintenance agreement. A company may use subcontractors for specific systems, but these subcontractors must be identified in the proposal. All work on warranted equipment must meet warranty requirements. Key scope of the proposals must fall within one or more of the following areas: Systems as identified above with remote and onsite monitoring and maintenance, fiber splicing and conduit placement. Building access for fiber, and general cleaning of the nodes and equipment,

Qualifications

Company must be a registered business, qualified to work in the State of Nevada and insured in the state of Nevada for all liability and workmen's compensation. Proposal should include qualifications of key personnel, including education, certifications, areas of expertise and years performing those tasks.
